WORK EXPERIENCE

Senior Software Engineer

May 2024 – Present

InfoEdge (India) Limited

Delhi-NCR, India

- Architected a **cross-repository knowledge graph** via Graphify, slashing engineering debugging overhead by **30%** and reducing LLM token consumption by **70x**.
- Engineered a custom **log-analyzer MCP server** across 7+ microservices via unified trace IDs, cutting cross-service investigation time by **40%**.
- Automated a production **Vertex AI** email-classification engine polling Microsoft Graph API, achieving **95% precision / 85% recall** to auto-route sales leads.
- Spearheaded the monolithic migration of hirist.tech from PHP to **Node.js/Next.js (SSR)**, accelerating page loading speeds by **35%** and driving a **25% SEO traffic surge**.

Software Engineer

Jun 2022 – May 2024

InfoEdge (India) Limited

Delhi-NCR, India

- Pioneered **Test-Driven Development (TDD)** practices and OpenAPI specs across 10+ core microservices, accelerating engineering team onboarding velocity by **30%**.
- Remediated high-risk **security vulnerabilities** (XML Injection, SQLi, XSS) across 5+ production services, eliminating **100% of flagged security flaws**.
- Optimized database access patterns and **Redis caching** strategies, decreasing backend API p99 latencies by **20%** under high concurrent user load.

PROJECTS

GNOME Ecosystem | Core Applications Contributor

Oct 2025 – Present

- Nautilus: Redesigned context-aware properties dialogs in **C** and **GTK** to suppress redundant navigation actions, streamlining user workflows across Linux desktops (MR #2070).
- Nautilus: Eliminated memory and widget lifecycle edge cases in **GTK** to prevent UI freezing and enhance application runtime stability (MR #2080).
- Newsflash: Integrated interactive keyboard shortcut tooltips with real-time keybinding tracking using native GTK signal handling, increasing feature discoverability by **35%** (MR #257).

Graphify | On-Device Knowledge Graph Engine

May 2026

- Developed parallel AST extraction leveraging Python ProcessPoolExecutor, achieving a **5x throughput increase** on repositories and cutting rendering latency by **45%** (PR #663).

Next.js | The React Framework

Jan 2026

- Modernized third-party Partytown script initialization protocols within official Vercel documentation, unblocking configuration for over **100,000+ developers** (PR #88928).

VPN Manager | Multi-VPN Automation Engine

Mar 2024

- Automated multi-profile network routing using OpenVPN3 and Bash, reducing engineer network switching overhead by **70%** (Script).

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, Python, Java, C/GTK, PHP, React.js, Next.js (SSR), Node.js, FastAPI, Django

AI & Systems Engineering: LLMs, Vertex AI (Gemini), Model Context Protocol (MCP), RAG Architecture, LangChain, Vector DBs

Databases & Infrastructure: MySQL, PostgreSQL, Redis, MongoDB, BullMQ, Git, AWS SQS, Microsoft Graph API, RabbitMQ, Nginx, Linux, Bash

EDUCATION

Birsa Institute of Technology, Sindri | *B.Tech. in Information Technology (CGPA: 8.36 / 10.0)* Aug 2018 – May 2022
